SUMMARY

Results-driven Full Stack Developer Intern and IT graduate from SLIIT with hands-on experience engineering scalable web applications. Proficient across the JavaScript/TypeScript ecosystem including ReactJS, Next.js, Node.js, Express.js, MongoDB, and RESTful API development. Strong foundation in Git version control, secure session authentication, and agile methodologies. Seeking to contribute to innovative digital solutions at Futura Solutions.

ACADEMIC QUALIFICATION

Bsc (Hons) in Information Technology (Specializing in information technology)
Institution: Sri Lanka Institute Of Information Technology | WGPA: 2.98 | Academic requirements completed.
2024-2026

G.C.E Advanced Level Examination, Sri Lanka | 2022
Chemistry: C | Physics: S | Combined Maths: S

PROFESSIONAL EXPERIENCE

Boswin Group (Pvt) Ltd 2024 – 2025
Frontend Developer & UI/UX Designer

- Built responsive, accessible UI components using **React.js**, **JavaScript (ES6+)**, and **Tailwind CSS**, translating Figma wireframes into production-ready code.
- Developed and maintained RESTful APIs using **Node.js** and **Express.js**, validating endpoints with **Postman** for seamless frontend-to-backend integration.
- Integrated **Firebase** for backend services, real-time database management, and client-side data synchronization.
- Collaborated on component state management and optimized application rendering performance across desktop and mobile devices.
- Collaborated within structured Git workflows, managing feature branches, pull requests, and code consistency across distributed development tasks.

PortCity Digital (Pvt) Ltd 2026
Operation Officer

- Monitored and verified financial transactions, including money transfers and user withdrawals.
- Used web platform to validate transaction logs, track requests.

TECHNICAL PROJECTS

Jobright — Full-Stack Job Application Tracker
Next.js 16, React 19, TypeScript, MongoDB, Mongoose, Better-Auth, Cloudinary, Tailwind CSS, REST APIs

- Developed a full-stack job application tracking system with **Next js** featuring an interactive Kanban board with drag-and-drop workflow automation and optimistic state management using @dnd-kit
- Implemented secure user authentication and session management using **Better-Auth** and MongoDB, automating user account creation and default board provisioning.
- Integrated **Cloudinary API** for cloud storage, enabling automated avatar image transformations and raw PDF/DOCX resume file management with programmatic asset deletion.

Edge-Proxied AI Portfolio Agent
React 19, Cloudflare Workers, Groq API (openai/gpt-oss-120b), Tailwind CSS, REST APIs
- Architected a serverless edge proxy on Cloudflare Workers to securely manage private LLM credentials, handle CORS handshakes, and inject strict persona guardrails before inference.
- Integrated Groq Cloud API for high-throughput LPU inference, streaming structured responses word-by-word with sub-second latency while programmatically filtering internal <think> reasoning traces.
- Engineered a responsive dark-mode chat interface in React 19 featuring spring cubic-bezier transitions, 3-second animated thinking states, and wheel-event isolation (data-lenis-prevent) over smooth scroll physics.
- Implemented a custom markdown parser to cleanly format bold headings and numbered hierarchies.

Autonomous Polytunnel Agricultural Robot (Agri-GMR)
Final-Year Research Project
- Autonomous agricultural robot integrating computer vision, navigation, microcontroller programming, and cloud.
- Implemented YOLOv8 for leaf disease detection, programmed microcontrollers, Firebase for real-time monitoring.

Courier Service Management System
- Integrated Real-time tracking, Automated driver assignment, Driver management, Notifications, and Customer feedback into a delivery management system.

Online Auction System
- Developed a Java-based auction system using MVC architecture, MySQL, backend logic, and a Java Swing user interface.

The Task Manager App
- Developed a native Android task manager in Kotlin with CRUD functionality, SQLite integration, and a mobile user interface.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js (App Router, SSR, SSG), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Backend & APIs:** Node.js, Express.js, RESTful APIs
- **Databases & Cloud:** MongoDB, MySQL, Firebase, Cloudinary
- **Computer Vision & Embedded**: YOLOv8, ESP32, Microcontroller Programming
- **Tools & Practices:** Git, GitHub, Figma, Postman, Vercel, Agile/Scrum, Jest / Unit Testing

VOLUNTEERING EXPERIENCES

SLIIT Media Unit - Committee Member (2025-2026) | STEM Up Educational Foundation - Volunteer (2025)
